

Quantal-fractal images

Tap water from the 6th district of Vienna, sample taken on 7.10.04

Tap water from Vienna, 5 hours after being placed on the UMH disc

The above comparison using quantal-fractal image diagnosis shows how greatly foodstuffs can be improved after by being left on a UMH disc for several hours. In this case, normal water was chosen to demonstrate the effect. The remarkable difference in the structure and colours proves that it has been tremendously vitalized and energized. Thanks to the Imedis-Voll method, it is possible to establish that the foodstuffs in question have been highly detoxified.
